INSIGHT · OCT 2026

USD Dominance ≠ a Strong USD.

The US can want a weaker dollar
and a more dominant dollar at the same time.
As always, the sequencing matters.

Quantity vs. Price.

Many conflate the 2.

They are related, but different.

THE TWO JOBS OF MONEY · 1944 – TODAY

The Network and the Vault.

	1944 – 1971	1971 – 2025	New System
MEDIUM OF EXCHANGE *the network*	US Dollar	Petrodollar *oil in USD*	Stablecoins
STORE OF VALUE *the vault*	Gold	Treasuries *recycled*	Gold + Bitcoin

A medium of exchange, as well as a store of value.

A BRIEF HISTORY · 1933 – TODAY

Study History.

1933 – 1944
Gold re-set from $20.67 to $35. The vault came first.

1971
The Petrodollar: oil in USD, recycled into Treasuries.

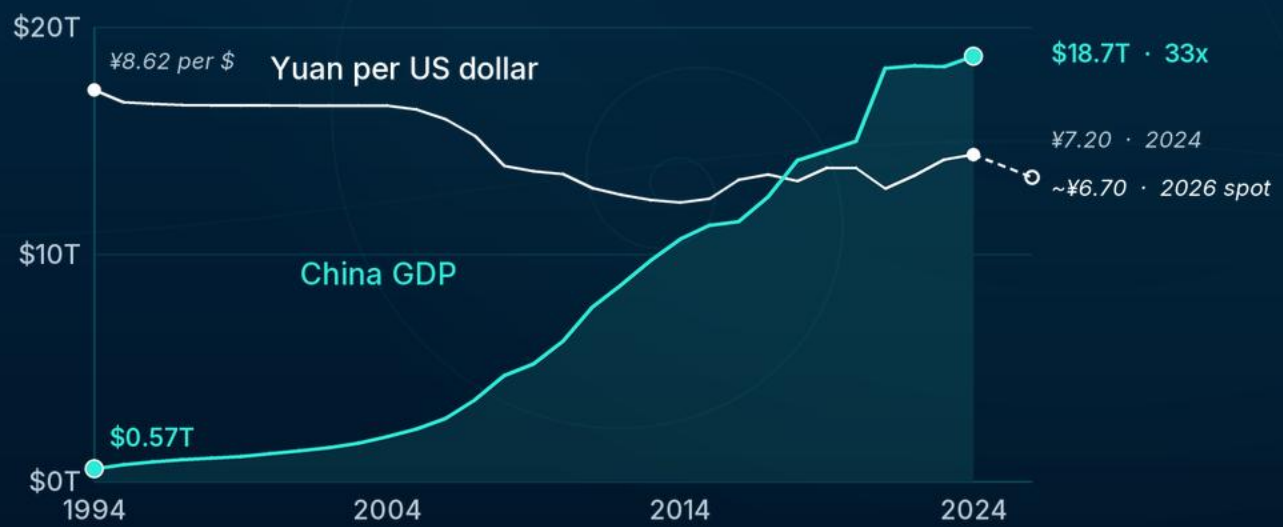

~2000
The yuan held down; Production moved to China.

Now
Stablecoins for the network. Gold + bitcoin for the vault.

The dollar network fed a dollar vault,
so the dollar did both jobs.

THE OTHER SIDE OF THE PRICE · 1994 – 2024

China grew 33x.
The peg barely moved.

It took the yuan ~30 years to move ~¥1.40.

In less than two, it has moved ~¥0.50.

A quiet transfer of physical reality.

–5.7M US factory jobs.

~8x US affiliate jobs in China.

BLS, 2000 – 2010 · BEA, 2000 – 2014.

To cut costs & boost margins,
US Corporates sent Production overseas.

The vault, then the price.

Lower the price after the vault is full,
and the move re-values your own balance sheet.

Filling the vault.

VENEZUELA · JAN – MAR 2026

Oil, minerals, and the gold.

Then a US-Venezuela gold deal, two months later.

IRAN

Gold and bitcoin confiscation.

All ‘stockpiling’ in preparation of the New System.

THE WESTERN HEMISPHERE

From Greenland to Panama.

Resources for a fully self-sustaining system.

Each lands before the price leg against gold, and well before the mark.

KEEP THIS MAP

What to watch.

→ **The network**

Stablecoin supply, swap lines, who settles in USD.

→ **The vault**

Gold and bitcoin brought home. Who sits at Treasury.

→ **The price**

The yuan and the yen first... then gold against everything.

→ **The mark**

Treasury gold revalued from $42.22 to 'market.'

Context is King, Sequencing is Queen.
